I am very happy and honored that my application for the RSA Membership Research Grant has been successful! This grant will not only enable me to further my research, but also to enhance interaction, networking and collaboration opportunities with the Association and the Regional Studies community.

The RSA Travel Grant provided me with financial support to enable me to attend an international conference in London where I was presenting a paper based on my PhD research into city branding. The conference was attended by delegates and speakers from all over the world, including Asia, Eastern Europe, Western Europe, Africa, North America and Australia. The opportunity to interact with scholars from a vast number of countries was phenomenal, and the contacts I made will be extremely valuable as I progress in my academic career.

The Regional Studies Association’s Research Network grants provide researchers with the opportunity to connect with colleagues across disciplines and countries and build comparative projects that expand the policy impact of our work in regional studies. Our RSA Research Network on Rethinking Manufacturing Policy resulted in a special issue of RSA’s Regions as well as numerous other opportunities for publication and dissemination of our work. RSA Research Networks advance the field and move emerging research programs forward in a collaborative, comparative context.
